WINNIPEG

And WESTERN CANADA

THE TRAVELLER who enters Western Canada from the south or east almost always does so through the chiefest gateway of this part of the continent—**Winnipeg**. Probably no other way to enter can be made that will afford the new comer so accurate and so pleasing a standard for measuring the development and resources of this remarkable section known as Western Canada. Out of this fertile prairie Winnipeg has grown. Upwards from a tiny trading post, the city has mounted and stands to-day a living evidence of the wonderful richness of the prairie soil, a magnificent monument to the spirit of progress that seized upon the people of Winnipeg, and of the prosperity that has been theirs. One hundred and thirty-five thousand people are now here. Broad, asphalted business streets stretch their lavish length across what was but a few years ago virgin prairie. Miles of boulevarded and smoothly paved streets make up a residential section, favorably comparable with many of the best cities in the world. Splendid hotel-plentiful in number capacity to supply the city; wholesale houses to furnish the large to the west; excellent and a public school ample opportunities parks, libraries, in make up a well organized city, has been gathered a place that in 1870—recollection of thousand souls within in 38 years the place that was perhaps never city of such substantial character as is a marked feature of the Gateway City of the Canadian West.

WINNIPEG stands at the very opening of its career, and remarkable as has been its progress and growth from the tiny trading post to the full grown and well equipped city, yet greater things lie before it and show clearly on the near horizon of **WINNIPEG'S** future.

The reason for this lies in the fact that the wonderful **WINNIPEG** which has grown up on the Manitoba prairie has for the basis of its growth, the solid foundation of agricultural resources beyond the dreams of agricultural avarice. Millions of acres of wheat land, which produce the highest average crop of any in the world, and of quality unsurpassed, other millions of acres of excellent grazing land, to which are added, in the case of nearby Ontario and the more distant British Columbia, other sources of trade and wealth in minerals, timber and fruit producing land, make the trade and manufacturing possibilities of **WINNIPEG** things not possible to be computed by cold calculation separated from the quality of the seed of things to come, but which can no more fail of being great than can the seed time and harvest fail of being.

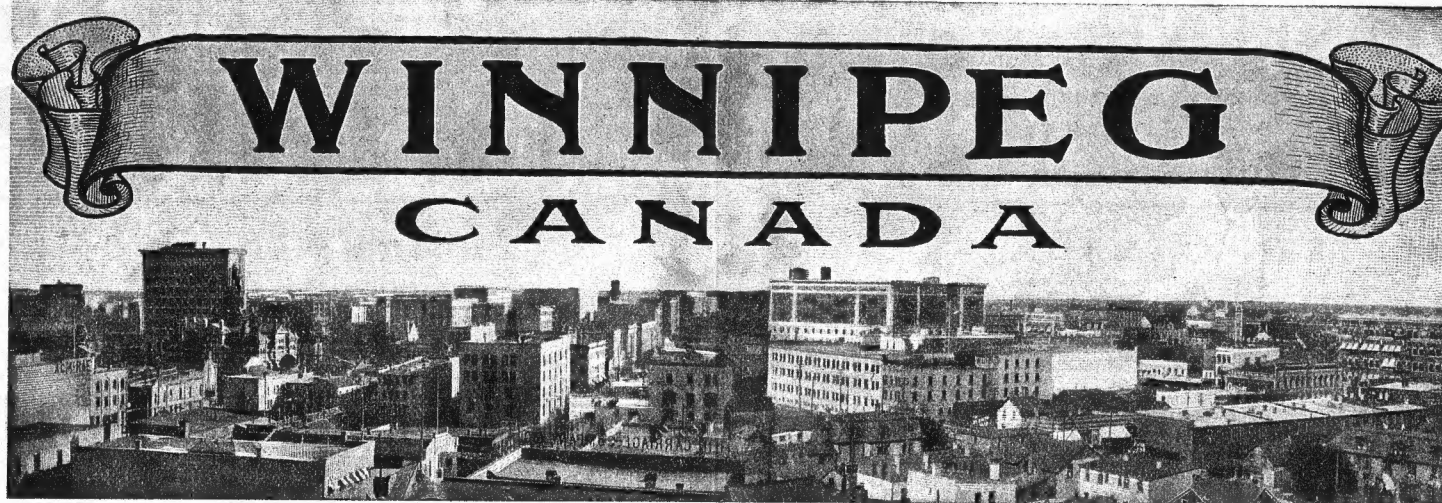

Upon the sure foundation of these substantial elements has the present **CITY OF WINNIPEG** been built and the traveller who visits the city for the first time sees not only the "substance of things hoped for," but also "the evidence of things not seen."

These are facts that clearly set forth why the travelling public should have their tickets read at least one way via **WINNIPEG** and through the **Great Canadian West**

MERCHANTS' Opportunity

One new town every other day for the past 8 years is the record of railway contribution to Winnipeg's extensive mercantile territory.
